SUMMARY

Highly skilled Full Stack Developer with 1.5 years of experience in Salesforce platform management, Apex development, Lightning Web Components, ASP.NET, and Java full-stack development. Currently pursuing a master's in computer science and certified in Salesforce and Java Full Stack Development. Committed to enhancing business processes and user experiences through innovative solutions.

EXPERIENCE

Sacred Heart University | Classroom Learning Assistant (CLA) **Bridgeport, USA** | 01/07/2025 - Present

- Assist the instructor during lectures by answering student questions, helping with in-class exercises, and clarifying complex data structure concepts.
- Hold scheduled office hours outside of class to provide additional support, answer questions, and offer guidance on assignments and projects.
- Help grade assignments, quizzes, and exams, ensuring consistency and providing constructive feedback to students.
- Create and maintain supplementary learning materials such as study guides, practice problems, and tutorials to aid student understanding.
- Mentor students by offering advice on study strategies, helping them overcome learning challenges, and encouraging active participation and engagement in the subject matter.

Wipro Limited | Project Engineer **Hyderabad, India** | 28/09/2022 - 16/12/2023

- Managed Salesforce platform, including data management, security setups, and user customizations.
- Objects, fields, page layouts, and record types were created and modified to satisfy business needs.
- To automate business processes, validation rules, workflows, process builders, and approval processes were developed and maintained.
- Used Data Loader and additional data management technologies to do data migrations.
- Worked for Phillips client, handling key tasks assigned by the team lead and participating in major development efforts.
- Developed solutions using Lightning Web Components (LWC) to ensure faster, risk-free development.
- Focused primarily on Salesforce Admin and Platform Developer 1 (PD1) tasks, alongside other major operational responsibilities.

Lovely InfoTech | Full Stack Developer **Punjab, India** | 10/01/2022 – 30/06/2022

- Developed and maintained a Student Academic Administration system as part of a full-stack project.
- Designed and implemented dynamic web pages using HTML, CSS, Bootstrap, and JavaScript for responsive and user-friendly interfaces.
- Utilized ASP.NET for backend development, ensuring efficient data management and integration of various modules related to student records.
- Collaborated with teams to ensure smooth functionality and enhanced the system's user experience by incorporating feedback.
- Gained expertise in web development, database management, and full-stack application architecture.

EDUCATION

SACRED HEART UNIVERSITY | *Master's in Computer Science* Connecticut, USA | **Jan 2024-Present**

- Cumulative **GPA:** 3.85/4.0

LOVELY PROFESSIONAL UNIVERSITY | *Bachelor's in Computer Science* Punjab, India | **2018-2022**

- Cumulative **GPA:** 7.42/10.0

PROJECTS

Job Hunt App

- Developed a Job Hunt app to facilitate job applications and searches. The program, which was created using Java full-stack technologies, improves job seekers' experiences by providing robust resume management, application tracking, and job posting features.
- We created RESTful APIs for backend services with Java and Spring Boot.
- Responsive front-end components were designed with HTML, CSS, and JavaScript to ensure a user-friendly experience.
- Integrated MySQL database to manage application data, job listings, and user profiles.

Student Academic Administration

- Using ASP.NET, a reliable system for student academic administration was created to modernize and simplify administrative procedures in educational institutions. The system is a centralized platform for effectively managing institutional resources, academic records, and student data.
- It ensured data integrity and performance, optimized SQL queries, and designed and implemented database structures.
- Using front-end technologies and the ASP.NET MVC framework, responsive and user-friendly web interfaces were developed.

Library Management System

- Developed a productive C++ Library Management System to improve as well as automate library operations, enabling easy administration of books, users, and administrative duties. The system provides a user-friendly interface designed specifically for librarians to maximize resource management efficiency.
- Developed and put into use class structures, data structures, and algorithms to facilitate user experiences and operation of libraries.

SKILLS

- | | |
|---------------------------------|---|
| • Programming Languages | C, C++, Java, C#, JavaScript (JS), Python |
| • Frameworks | Angular, Asp.net, Spring Boot |
| • Front-End Technologies | Html, CSS, Bootstrap |
| • Database | SQL, MongoDB |
