

Sravan Kumar Bodakonda

bodakondasravankumar@gmail.com | +1(203)864-1829 | [LinkedIn](#) | [Portfolio](#) | [Trail Head](#) | [Github](#)

SKILLS

Front-End

HTML, CSS, Java Script ,React.js, Angular.js, Bootstrap

Back-End

Java, Spring Boot, Asp.net, C#

Database

SQL, MySQL

Salesforce

Apex, Visualforce, Lightning Web Components (LWC), Salesforce Administration, Process Builder, Flow, REST/SOAP API Integration.

Programming Languages

C, C++, Python

Tools

Git, RESTful API's, Debugging and Testing

EXPERIENCE

One Community Global | Software Engineer

Mar 2025 – Present

- Developing and maintaining full-stack web features using **React.js** on the frontend and **Node.js** on the backend.
- Collaborated with a remote Agile team to implement scalable solutions and contribute to open-source community projects.
- Participated in code reviews, debugging, and API integration to ensure high-quality, maintainable code.

Sacred Heart University | Classroom Learning Assistant (CLA)

Jan 2025 – Mar 2025

- Mentored and guided students in Data Structures and Algorithms (DSA), reinforcing problem-solving skills and optimizing code efficiency, enhancing algorithmic thinking essential for software development.
- Conducted hands-on coding sessions and assisted in debugging complex DSA problems, improving students' proficiency in Java, C++, and algorithmic techniques used in real-world software engineering.

Wipro Limited | Project Engineer

Sept 2022 - Dec 2023

- Joined as a Java Full Stack Developer, contributing to the design, development, and maintenance of web applications using Java, Spring Boot, Angular, and MySQL.
- Gained expertise in building RESTful APIs, optimizing database queries, and creating responsive front-end interfaces.
- Constructed custom Lightning Web Components (LWCs) to streamline data input and validation processes, resulting in a 20% reduction in data entry errors across the sales and customer support teams.
- Engineered customized Salesforce solutions utilizing Apex, Visualforce, and Lightning Web Components, resulting in a 15% improvement in sales team efficiency through streamlined workflow automation and custom dashboards.

- Transformed Student Academic Administration system with comprehensive updates, resulting in a 40% decrease in data entry errors and streamlined administrative workflows for the university staff.
- Revolutionized user experience of student portal by constructing interactive, cross-browser compatible web pages using HTML, CSS, and JavaScript, resulting in a 90% satisfaction rating based on user feedback surveys.
- Constructed the student records database using ASP.NET, implementing data validation rules that improved data accuracy by 35% and reduced record retrieval time by 20%.

EDUCATION

SACRED HEART UNIVERSITY | *Master's in Computer Science*

Jan 2024-Mar 2025

- Cumulative GPA: 3.85/4.0

LOVELY PROFESSIONAL UNIVERSITY

Aug 2018 - May 2022

Bachelor's in computer science *Punjab, India*

PROJECTS

Restro Realm

- Pioneered a user-friendly restaurant website with Angular, HTML, CSS, and Bootstrap, achieving a 95% customer satisfaction score based on ease of navigation and online ordering.
- Front-End: Built a responsive and user-friendly interface using Angular, HTML, CSS, and Bootstrap.
- Engineered RESTful APIs using Java and Spring Boot, which facilitated a 40% reduction in order processing time and improved user experience through streamlined data management.
- Orchestrated the MySQL database schema, normalizing menu items, user profiles, and granular order details, resulting in a 15% faster query response time and enhanced data integrity for reporting purposes.

Job Hunt App

- Developed responsive UI using HTML, CSS, and JavaScript for a job application platform; this initiative secured internal recognition for improving user interface responsiveness by 40%.
- Engineered intuitive user interfaces with HTML, CSS, and JavaScript, resulting in a 30% decrease in user bounce rate on key landing pages for job application platforms.
- Constructed robust RESTful APIs with Java and Spring Boot, providing seamless integration between front-end and back-end systems; this achievement earned recognition as 'Most Innovative Project' within the engineering team.

Student Academic Administration

- Automated student data management processes using ASP.NET, slashing administrative time spent on record-keeping by 20 hours per week and improving data accuracy.
- Forged interactive student portals leveraging ASP.NET MVC and React, resulting in a 40% improvement in student satisfaction scores based on ease of navigation and intuitive design.
- Pioneered a centralized platform for student data management, academic record tracking, and institutional resource allocation, earning recognition as “Most Innovative Solution” within the IT Department.

CERTIFICATIONS

- Java Full Stack under the Wipro Velocity Program
- Salesforce Administrator
- Salesforce Platform Development 1
- Salesforce Associate
- Salesforce AI Associate
- Salesforce Copado
